

FAA Safety Team presents:

# **Aircraft Systems and Emergencies**

Understanding the systems specific to the aircraft you fly can give you peace of mind, as well as save you in an emergency. This seminar will explore all of the common aircraft systems, fuel, electrical, control systems and some of the lesser-known systems (pitot-static drains, emergency avionics switch) in the Piper Cherokee-series (PA-28) aircraft. This information will then be demonstrated how it can be put to use during various in-flight emergencies, or even to prevent the emergency from occurring in the first place. This seminar is focused on the PA-28, much of it is also applicable to other aircraft. Refreshments provided by OXC Flying Club. Thanks to NVCC for hosting this special event. Click on the link below and register TODAY.

**Directions:** From I-84 take exit 18 to the Chase parkway to Naugatuck Valley Community College

#### **A message from the National FAASTeam Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
